

**MODEL CFC
CLEARFIRE CONDENSING BOILER
PRESSURE VESSEL WARRANTY
FIRESIDE**

In addition to our Standard Warranty, Cleaver-Brooks warrants the fireside surfaces of this boiler for a period of ten (10) years from the date of shipment when installed in accordance with Cleaver-Brooks installation documentation and operated in accordance with the Operation/Service Manual.

This warranty covers leaks in the pressure vessel including the furnace, tubes, tube sheets and shell (not including failed gaskets), which, from our inspection, are attributed to fireside corrosion. This warranty does not cover damage or failures that are attributed, by our inspection, to corrosion resulting from corrosive ambient conditions, contaminated air supply, operation at low water level, accumulation of scale, sludge or dirt in the boiler, or other improper service, operation or neglect.

Cleaver-Brooks' liability hereunder is limited to furnishing a replacement pressure vessel, or component parts thereof, as deemed necessary by our inspection. Cleaver-Brooks is not responsible for shipping, handling, installation and other costs, including all costs associated with the removal and disposition of the old pressure vessel or component parts. In no event shall Cleaver-Brooks be responsible for any incidental, consequential or other damages, including, without limitation, any damages resulting from loss of use of the boiler.
